INVC NEWS

New Delhi, A depression over the northeast & adjoining east central Arabian Sea has moved slightly eastwards and is lay centered about 280 Km south west of Porbandar at 0530 hrs IST today, the 23rd June 2015. The system is likely to further slowly move east-north eastwards and may concentrate into a deep depression during next 24 hours. Squally wind speeds reaching 45-55 kmph gusting to 65 kmph are expected to prevail along and off Gujarat and north Maharashtra coast during next 24 hours. Sea condition would be rough to very rough and fishermen have been warned not to venture into seas over the next two days.
