India Ground Handling Services Market Size and Overview

The market for ground handling services in India is at a growth stage with a large number of players competing for a share in the market. The market grew at an increasing rate during FY’2013 – FY’2018. The primary growth drivers of the ground handling services market have been increasing air passenger traffic, rising amount of air freight and increasing number of tourist visits in India. These were backed by

technological advancement in GSE (Ground Support Equipment) and favorable government policies.

India Ground Handling Services Market Segmentation

The ground handling services market in India has been segmented by types of services offered into passenger and ramp handling services and cargo handling services. Passenger and ramp handling services are offered in passenger flights and cargo handling services are offered in freighter flights. Revenue from passenger and ramp handling services has accounted for a higher share in the market due to the large number of and high frequency of passenger flights in India.

Competitive Landscape in India Ground Handling Services Market

The India ground handling services market is fragmented with a large number of players competing in the market. Air India Air Transport Services Limited is the leading player in terms of revenue in the India ground handling services market. Air India SATS Airport Services is the second largest company followed by Bird Worldwide Flight Services and Celebi NAS Airport Services Private Limited. The other major companies in India ground handling services market are GlobeGround India Private Limited, Menzies Aviation Bobba (Bangalore) Private Limited, Bhadra International India Private Limited and Indo-Thai Airport Management Services. Companies compete on the basis of service costs and number of ground handling stations.

Future Outlook of India Ground Handling Services Market

The ground handling services market in India is expected to grow at a positive double digit CAGR during FY'2019 - FY'2026. Increase in the level of implementation of favorable government schemes in the ground handling and aviation sector will be the major contributor to this growth. Future catalysts will be the entry of new domestic and foreign players in the airport ground handling services market with airlines increasing their fleet sizes and completion of construction of new airports.
