INVC NEWS

New Delhi ,

To reduce the pollution level, suddenly increased after the lockdown, New Delhi Municipal Council (NDMC) introduced '**Anti Smog Gun**' - **a machine which can reduce pollution level. First of its kind machine installed in Central Park, Connaught Place.**

Shri Dharmendra, Chairman, NDMC inaugurated an 'Anti Smog Gun' today at Central Park, Connaught Place in the presence of Secretary, NDMC - Shri Amit Singla and other senior officers of NDMC.

Anti-Smog Gun is designed to create an ultra-fine fog consisting of very fine water droplets (less than 10 micron size). These tiny water droplets are spread in larger area with the help of high speed fans which absorb even the smallest dust particles in the air.

This device is designed to reduce air pollution by spraying atomised water into the atmosphere so that the dust and pollution particles get clear from the environment and PM 10/2.5 gets reduced.
