The brand forays in the EV category launching two slow speed E-Scooters

E- Scooters offer 75 kms of range on full battery, taking 3.5 hrs of charging time

INVC NEWS

Bangalore,

EVTRIC Motors a new venture in electric vehicle space launched two electric scooters in the slow speed category -EVTRIC AXIS and EVTRIC RIDE for the Indian audiences at an affordable price of ex-showroom INR 64,994/- and 67,996/- respectively. EVTRIC has announced these products in line with its initiative to join the ongoing e-mobility mission in India. The e-scooters are targeted at the young and Family audience of India that is inclined towards responsible commutation and environment-friendly practices.

PAPL- an India-based Automation Company recently launched EVTRIC Motors to fuel the ongoing electric vehicle revolution in India, with its expertise in the automation space. The company shall work towards providing users with the finest array of EV offerings including- bicycles, electric scooters, ev motorcycles, and Electric three-wheelers.

The **EVTRIC AXIS** is available in four scintillating colours including Mercury white, Persian red, Lemon yellow, and Emperor grey, to go with the spirit of the youth. The **EVTRIC RIDE** designed keeping in mind the needs of Indian families allows more seating space, and is available in striking colours - Deep Cerulean Blue, Persian Red, Sliver, Nobel Grey, Mercury White.

The e- scooter comes with a detachable lithium-ion battery option that provides the users with the convenience of charging. The scooters have a loading capacity of 150 kgs, clocking a motor power of 250W. Both the e-scooters take around 3.5 hours of charging time for a full battery, covering a distance of

over 75 kms on a single charge, with a top speed of 25km/hr.

The products offer a host of lucrative features including- **LED headlamps, Robotic welding chassis, side stand sensor, 12-inch tubeless tyre with 190mm ground clearance** for stress-free rides on bumpy roads. The e-scooters also enhance the user's experience of an EV, with the unique **reverse park assist function**, thus making it a feature-loaded machine.
